Requirement -

Animal → Albino rat

Drug → Normal saline 0.9% Runitidine

Instrument → microscope (dissecting) 10x magnification lense.

principle - peptic ulcer is one also the most prevalent gastro-intestinal disorder. The aim of present study is to demonstrate the anti-ulcer activity of drug using the anti-ulcer pylorus ligation (SHAY) rat model. This was first demonstrate by study Shay in 1945 ligation at rat pylorus result to acute gastric ulcer. - This proceduze is used in screen the drug for their anti-secretory and anti-ulcer activity.

proceduze :- ① Rat fasted for 24 hrs
prior to pylorus ligation.

2. Take 6 albino rats are to be divided into two group consisting of three animals in each group.

3. Saline is tube administered to control group and Ranitidine to other group.

4. Drug administered once for two days and 30 min prior to ligation.

5. under light ether anesthesia a midline abdominal incision is made and pylorus will be ligation and wound is closed.

6) Then rats are tubes placed individually in separate cages without food & water.

7. Sacrifices the animals by decapitation after 4 hrs and open the stomach and collect the stomach contain in a centrifuge tube.

8) Wash the pylorus and ulcers observed under 10x magnification lense.

Result - The sample drug show antiulcer activity.

Conclusion - Higher no of ulcers count in vehicle treated group than drug treated and reflect the anti-ulcer activity of drug (omeprazole)

Exp. No 1

Aim: Design a questionnaire using a word processing package to gather information about a particular database

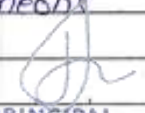

What is questionnaire: A questionnaire is a research instrument consisting of a series of questions for the purpose of gathering information from respondents

Question sequence: In general, questions should flow logically from one to the next. To achieve the best response rates, questions should flow from the least sensitive to the most sensitive, from the more general to the more specific.

There typically is a flow that should be followed when constructing a questionnaire in regards to the order that the questions are asked. The order is as follows:

- ① Screens
- ② Warm-up
- ③ Transitions
- ④ Skip
- ⑤ Difficult
- ⑥ Classification

Screen: Screens are used as a screening method to find out early whether or not someone should complete the questionnaire

ICT ENABLE TEACHING LEARNING:

To enable the effective use of Information and Communication Technology (ICT) tools by the teachers, all the staff members can support, encourage & motivate to the students. Use of digital classroom by faculty for better understanding of student.

The institute has provided broadband internet facility-wireless fidelity (WI-FI) and LCD projector in the classrooms, seminar hall, computer lab etc. Teachers deliver the classroom sessions in the form of PowerPoint presentations. Moreover the teachers provide important web links to videos, research papers, research articles, patents or e-books to facilitate ready access to students.

We use ICT tools for improvement of teaching quality.

ICT used following tools for Quality of teaching-learning process in HSBPVT'S GOI, FOP:

- **Use of online teaching facility during COVID Period:** In COVID period we use the some ICT for better teaching for student. Following ICT tools are used such as Google Classrooms, Vmedulife, Google meet, Zoom etc.
- **Use of software:** We use various software's for quality education such as EXPHARM, Opus, Spectra Manager, AUTOLib, Vmedulife, ERP Smart school software etc.

Spectra Manager Software for UV-Spectroscopy

Opus Software for FTIR
